In this lab you will practice playing a guessing game using Spring MVC.

Your application will generate a random number between 1 and 100 (ONE PER SESSION).
The user will play the game till he guesses that number correct.
Screen shots for the application are given below.

Welcome to the guessing game. Enter a number between 1 and 100.

Enter your guess [   ]

[Guess]

Welcome to the guessing game. Enter a number between 1 and 100.

Enter your guess [50   ]

[Guess]

Aim Lower

Attempts : 1

Welcome to the guessing game. Enter a number between 1 and 100.

Enter your guess [30   ]

[Guess]

Aim Higher

Attempts : 2

Welcome to the guessing game. Enter a number between 1 and 100.

Invalid input!!!

Enter your guess [dfdsf   ]

[Guess]

Attempts : 3

If the game is over display a message in a **new page** like this

"You have got it in 4 attempts!!!"
